

MEGATRON PUSH-AWAY QUICK RELEASE CHICKEN LOOP

THE MEGATRON CHICKEN LOOP FEATURES PUSH-AWAY RELEASE WITH TOTAL FLAG OUT OF THE KITE. THE RELEASE HANDLE IS ERGONOMIC WITH POSITIVE FORCES FOR QUICK AND EASY RELEASE. SIMPLE RE-ASSEMBLY SAVES TIME AND GETS YOU BACK UP AND RIDING FASTER.

All riders should attach their kite leash to the total flag out system. This is the small eyelet of the steel ring at the bottom of the Megatron. When the chicken loop is released, the kite will flag out and fall to the water/ground.

Advanced Riders:
(not recommended, use at your own risk)
Riders performing unhooked tricks or who are more confident and have spent many hours kiting can attach to the ring using the Expert mode, where the chickenloop runs through the large eye of the steel ring.

NOTE: When letting go of the bar in Expert mode (without releasing the Megatron, e.g. missed handle pass) the kite will depower but WILL NOT flag out. Be aware in this situation, the Megatron will be out of reach and can therefore not be released. When hooked in and releasing the Megatron the steel ring automatically slips off the chicken loop and the kite will flag out.

In all situations make sure that all lines are clear of all working release systems and the kite leash is connected in the right way.
